an introduction to the 1985 NRS report series and project overview; a chapter explaining how to read and interpret the tabulations; a set of two-way tables of NRS items crossed with five banner variables; and four technical appendixes including each of the four 1985 NRS instruments.

Separate tabulation volumes were produced for each of the three Army components, the Regular Active Army (RA), the Army Reserve (USAR), and Army National Guard (ARNG). Tabulations reflect data gathered during the 1985 summer administration of the NRS. The crossing variables used in each tabulation volume include demographic and service-related characteristics and vary across the different components.

Other reports in this series provide more extensive documentation of the background and approach to the summer administration of the 1985 NRS. A combined methodology report compares procedures employed in the 1984 and 1985 survey administrations. Other reports are also available for the 1982, 1983, and 1984 administrations.

This project was sponsored by the Directorate of Program Analysis and Evaluation, U.S. Army Recruiting Command, Office of the Deputy Chief of Staff for Personnel. The U.S. Army Recruiting Command provided funding for the survey instrumentation, administration, data processing, data base preparation, documentation, and tabular descriptions produced under Contract No. MDA903-84-C-0446, expiring 30 September 1986. Westat, Inc., has been the contractor for this effort, with Veronica Nieva and Jeanna Celeste serving, respectively, as Principal Investigator and Project Director.

Westat Project Staff:

Bruce F. Allen, Jeanna F. Celeste, Jansen B. Davis,
Dorrit C. Garver, Gayle M. Glade, Elena C. Hernandez,

FOREWORD

The ARI Surveys of Army Recruits, familiarly known as New Recruit Surveys, have become an important source of information for Army policymakers and planners. These surveys were originally designed in 1982 to answer questions concerning the demographics and enlistment motivations of new Army recruits. In addition to the ability to track changes in recruits from year to year, this series of surveys offers the Army an opportunity to gather new information in each year of the survey.

The 1982 and 1983 Surveys were directly commissioned by the Deputy Chief of Staff for Personnel. The 1984 and 1985 Surveys were sponsored by the U.S. Army Recruiting Command and were undertaken with the continuing interest of the Office of the Deputy Chief of Staff for Personnel. While the sponsorship, specific questions, and interests may change year to year, the charter for these surveys remains the same:

- Determine who is enlisting in the Army and why.
- Determine how to target recruiting resources to attract high-quality recruits.
- Determine why recent recruits joined and their propensity to remain in the service.
- Determine which recruiting and advertising practices are proving the most successful and why.

In addition to addressing these specific objectives, this survey effort expands the availability of data to model Army enlistment and reenlistment processes.

Technical Director

ACKNOWLEDGMENTS

Westat wishes to acknowledge the support of the many people who played various important roles in the survey instrumentation, administration, data preparation, entry, tabular analysis, data base construction, and documentation of the 1985 Summer ARI Survey of Army Recruits. We especially appreciate all the assistance provided by the U.S. Army Recruiting Command, which is commended for its cooperation in problem resolution, steadfast support, and continued interest in this work.

We gratefully acknowledge that this survey effort could not have succeeded without the cooperation of personnel at the U.S. Army Reception Stations. They worked closely with us in the scheduling and administration of the survey, working survey operations into their already hectic schedules for processing new recruits.

THE 1985 ARI SURVEY OF ARMY RECRUITS: TABULAR DESCRIPTION
OF NPS ARMY RESERVE ACCESSIONS, VOLUME 1

EXECUTIVE SUMMARY

Requirement:

To obtain information on the characteristics, enlistment motivations, attitudes, and knowledge of recruits at the point of initial entry into the Army.

Procedure:

The Summer 1985 New Recruit Survey (NRS) is the sixth in a series of recruit surveys administered by the Army Research Institute (ARI). It is an expanded version of the 1984 ARI survey and incorporates new questions on recruits' prior service experience, college experiences, enlistment duty option preferences, and new occupational and TV programming preferences.

Westat was contracted to work with ARI in performing survey design and instrumentation, taking further responsibility for survey administration, data cleaning and entry, data base construction, tabular analysis, and survey documentation. Data were collected in group settings during initial recruit processing at all eight Army Reception Stations during June, July, August, and September of 1985. A modified Latin Square Design was employed to randomize the selection of survey weeks across all eight Reception Stations during the field period for data collection. Westat coordinated with Reception Station personnel in scheduling and supervising the survey administrations. The NRS was self-administered and recruits were directed to indicate their responses directly on their survey instruments.

Four forms of the NRS were administered to recruits. Forms A, B, and C were administered to Regular Army (RA) recruits, and Form D was given to National Guard and Army Reserve recruits. Regular Army recruits had an equal chance of receiving any one of the three RA forms.

Survey forms were entered into receipt control as they were received from the field sites. Survey data were examined by coding staff and forwarded for key entry. Care was taken to retain answers exactly as provided by respondents. Keyed data were subsequently run through a series of value range and logic checks and corrected as needed. A user's manual, codebooks, tabulation volumes, and a report on the survey methodology, "lessons learned," and recommendations were produced.

Findings:

A total of 12,536 Army recruits completed the 1985 Summer NRS. Of these, based on Army personnel records, 11,213 had no prior military service and 908 had prior service experience. (The status of the remaining 415 was not ascertained.) The sampling plan employed imposes some restrictions on the generalizability of survey results to the population of FY 1985 Army accessions. However, overall the survey effort was successful in obtaining updated information regarding new recruits.

Utilization of Findings:

ARI Surveys of Army Recruits provide information to Army personnel planners about the quantity and quality of recruits entering the Army. In particular, information regarding the characteristics, knowledge of enlistment options, and enlistment motivations of new recruits enables Army personnel planners to be cognizant of present enlistment trends. Awareness of these trends is vital, in turn, for preparing for future manpower requirements. The Summer 1985 New Recruit Survey has already been used for these purposes, as well as for assessing the media habits of recruits in order to maximize the impact of Army advertising.

THE 1985 ARI SURVEY OF ARMY RECRUITS:
TABULAR DESCRIPTION OF NPS (ACTIVE) ARMY ACCESSIONS,
VOLUME 1

INTRODUCTION

The purpose of this document and a companion volume, The 1985 Survey of Army Recruits: Tabular Description of NPS (Active) Army Accessions, Volume 2 (Research Product 86-15), is to provide an initial examination of the attitudes and characteristics of non-prior service Army recruits entering active duty during the Summer of 1985. The attitudes and characteristics of the new recruits were obtained on the 1985 ARI Survey of Army Recruits, more commonly referred to as the ARI New Recruit Survey (NRS), and from Army personnel records.

This report is one of eight reports produced to document the approach and results obtained from the Summer administration of the 1985 NRS. The 1985 Summer NRS was administered during June, July, August, and September of 1985. There are separate user's manuals and codebooks which respectively document the survey approach and databases:

- Westat, Inc. (1986, May). The 1985 ARI Survey of Army Recruits: User's Manual (Research Note 86-50). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1985 ARI Survey of Army Recruits: Codebook for Summer 85 Active Army Survey Respondents (Research Note 86-48). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1985 ARI Survey of Army Recruits: Codebook for Summer 85 USAR & ARNG Survey Respondents (Research Note 86-49). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

Readers desiring an examination of the survey instrument development and content, survey administration procedures, and data quality assessments are referred to the user's manual. Other readers may be interested in examining the construction of recoded survey items and variables derived using data from Army personnel records, as well as obtaining access to the data files; these readers are directed to the codebooks. The data obtained from the three survey forms (A, B, and C) administered to Regular (active) Army (RA) recruits are documented in one codebook, and the data obtained from Form D, which was administered to new

recruits for the U.S. Army Reserve (USAR) and the Army National Guard (ARNG), are documented in a separate report. Separate data files were set up containing information specific to the Army service components, i.e., RA, and USAR/ARNG.

The initial survey results for other Army components surveyed during the 1985 Summer administration are reported in separate documents:

- Westat, Inc. (1986, May). The 1985 ARI Survey of Army Recruits: Tabular Description of NPS Army National Guard Accessions (Research Product 86-16). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1985 ARI Survey of Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 1 (Research Product 86-17). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1985 ARI Survey of Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 2 (Research Product 86-18). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

Volume 1 in each set of tabular descriptions for the RA and USAR components presents tables of NRS items crossed by five different respondent demographics, such as gender, ethnic/racial group, AFQT¹ category, and marital status. Volume 2 contains five service-related characteristics, such as recruiting brigade, age at contract signing or accession, and term of enlistment crossed with NRS items. The actual crossing variables vary according to component. Due to insufficient personnel data, the ARNG has a single volume of tabular descriptions, comprised of NRS items crossed by three respondent demographics and two service-related characteristics.

It is important to note that the variable used to determine classification of a respondent into an AFQT category for the 1985 NRS crosstabulation volumes was not always the AFQT category of record (i.e., the category recorded on the Operations Reporting

¹A respondent's AFQT category is based on his/her Armed Forces Qualification Test (AFQT) score on the Armed Services Vocational Aptitude Battery (ASVAB). The AFQT score scale has traditionally been divided into categories for purposes of reporting recruit trainability.

Master File (ORMF)² record for that respondent). Instead, AFQT category of record for recruits tested on ASVAB prior to 1 October 1984 was recoded to be consistent with the 1980 Youth Norms for AFQT that went into effect 1 October 1984. This recoding will facilitate the comparison of the 1985 NRS tabulations with previous and future administrations of the survey.

Each tabulation volume contains an introduction to the 1985 NRS report series, project overview, a chapter on how to use the volume, index to the tables, and the contingency tables themselves. Technical appendixes to the volumes include the four NRS-85 instruments. One additional report of potential interest presents a comparison of the methodologies used in the 1984 and 1985 administrations of the NRS. This report is entitled: The 1984 and 1985 ARI Survey of Army Recruits: Methodology and Recommendations for Future Administrations (Technical Report 706).

Organization of Tabulation Volume 1 -- Summer NRS-85, RA Component

This document provides both an overview of the 1985 NRS as well as tabular entries for the survey items by the first five of ten crossing variables. The volume is divided into four major sections: an introduction and project overview; a chapter on how to read and interpret the tabulations; tabulations of the survey responses of new RA recruits entering active duty during the Summer of 1985 by the first set of five crossing variables; and four technical appendixes.

The first chapter introduces Volume 1 of the Summer 1985 NRS, RA component, within the context of the eight-volume series of reports produced to document the Summer administration of the 1985 NRS. A report comparing the methodologies employed in the 1984 and 1985 NRS is also mentioned. The structure and organization of the tabulation volume is described followed by a brief overview of the 1985 NRS project.

²The Operations Reporting Master File (ORMF) contains Army personnel records from two sources, MEPRS and REQUEST. The acronyms MEPRS and REQUEST stand for the Military Entrance Processing Reporting System, and Recruit Quota System, respectively. The MEPRS data system contains information about DoD personnel being voluntarily processed into a branch of the Armed Forces; the system is documented in MEPCOM Regulation 18-5. REQUEST is the Army's data system used to record information about enlistees into one of the Army components (Regular Army, Army Reserve, and Army National Guard). The REQUEST system is documented in Army Regulation (AR) 601-210.

The second chapter is a guide to interpretation of the crosstables. This section of the report explains how to read the tabulation pages, provides tabulation volume conventions, discusses the exclusion of selected respondents from six survey items for presentation in the tabulations, provides guidance in the interpretation of the chi-square statistic, and explains how to use the tabulation index.

The next major section of this document is comprised of the tabulation index and the tables themselves. Each survey item appears in five two-way tables corresponding to each of the first five crossing variables. Tables of survey items are organized according to content area. Six major areas are identified.

The report is supplemented by four technical appendixes. The appendixes contain:

- The 1985 ARI Survey of Active Army Recruits - Form A (Appendix A);
- The 1985 ARI Survey of Active Army Recruits - Form B (Appendix B);
- The 1985 ARI Survey of Active Army Recruits - Form C (Appendix C); and
- The 1985 ARI Survey of Army Reserve/National Guard Recruits - Form D (Appendix D).

1985 NRS Project Overview

The ARI Surveys of Army Recruits, commonly known as the ARI New Recruit Surveys (NRS), are conducted on a regular basis to provide updated information on the characteristics, knowledge of enlistment options, and enlistment motivations of recruits at the point of their initial entry into service. Military personnel planners require such information on a regular basis to monitor current recruiting strategies and to forecast future enlistment trends.

The NRS were begun in the summer of 1982. Expanded versions of the 1982 surveys were created for NRS-83 and were administered in the Summer of 1983 and Winter of 1984. Further revisions and expansions were made in the 1984/85 NRS instruments for administration in the Summer of 1984 and Fall/Winter of FY 85.

Major revisions in methodology were introduced for NRS-85. Questions included on the 1985 NRS were restructured to facilitate provision of answers directly on the survey instrument; all previous NRS used optical scanning answer sheets. New questions regarding recruits' prior service and college experiences were

included and other question series were expanded, such as the media habit items used for Army advertising planning. Thus, in addition to the ability to track changes in recruits from year to year, this series of surveys offers the Army an opportunity to gather new information in each year of the survey.

The 1982 and 1983 surveys were directly commissioned by the Deputy Chief of Staff for Personnel. The 1984 and 1985 NRS were sponsored by the U.S. Army Recruiting Command and were undertaken with the continuing interest of the Deputy Chief of Staff for Personnel. While the sponsorship, specific questions, and interests may change from year to year, the charter for these surveys remains the same. The four main research requirements have been to determine: (1) the demographic composition of entering recruits; (2) how to target recruiting resources to attract high quality recruits; (3) new recruits' enlistment motivations and propensity for remaining in service; and (4) which recruiting and advertising practices are proving the most successful and why.

The 1985 Summer NRS is the sixth in the series of recruit surveys conducted by ARI. Survey data were collected in group settings during recruit processing for initial entry training at all eight Army Reception Stations during June, July, August, and September of 1985. ARI and Westat staff worked in conjunction with Reception Station personnel in scheduling survey administrations. While previous NRS administrations were monitored by Reception Station personnel using instructions prepared by ARI, the 1985 administrations were supervised by Westat NRS staff located on-site. The NRS was self-administered and recruits were directed to indicate their responses directly on the survey instruments.

Four forms of the NRS were administered to recruits. Forms A, B, and C were administered to Regular Army recruits, and Form D was given to National Guard and Army Reserve recruits. Regular Army recruits had an equal chance of receiving any one of the three forms.

A total of 12,536 Army recruits completed the 1985 NRS. The surveys were distributed across components as follows:

<u>RA</u>	<u>USAR</u>	<u>ARNG</u>
7,220	2,265	3,051

The surveys were coded taking care to record responses exactly as provided to the extent possible. Survey data were then keyed to tape and edited for value ranges and logical consistency. User's manuals, codebooks, tabulation volumes, and a report comparing the 1984 and 1985 survey methodologies, "lessons learned," and recommendations were produced.

The sampling plan employed in the NRS-85 imposes some restrictions on the generalizability of survey results to the population of Army accessions entering service during the third and fourth quarters of FY 85, as well as to accessions for the entire fiscal year (FY 85). However, overall, the survey effort was successful in obtaining updated information regarding new recruits.

The 1985 ARI Survey of Army Recruits provides information to Army personnel planners about the quantity and quality of recruits entering the Army. In particular, information regarding the characteristics, knowledge of enlistment options, and enlistment motivations of new recruits enables Army personnel planners to be cognizant of present enlistment trends. Awareness of these trends is vital, in turn, for preparing for future manpower requirements.

HOW TO USE THIS VOLUME

The purpose of this chapter of the Tabular Description is to provide assistance in reading the Summer 1985 NRS tabulations for the RA component. The first section in this chapter briefly reviews the tabulation volume composition. The next sections in this chapter provide examples of the two different types of tabulation pages and a simple interpretation of the chi-square statistic. This is followed by a brief discussion of the use of the tabulation index to locate specific tables, and finally presentation of the index itself.

Tabulation Composition

The purpose of the tabulation volume is to provide an overview of survey results for Summer NRS-85 respondents by service component. Two-volume tabulation sets are available for new recruits entering the Regular Active Army and the Army Reserve during the summer of 1985. A separate tabulation volume was produced for new recruits entering the Army National Guard in the summer of 1985. The two-volume sets of tabular descriptions produced for the RA and USAR provide tables of survey items crossed by ten demographic and service-related characteristics. The single volume of tabular descriptions of the ARNG contains survey variables crossed by a combination of demographic and service-related characteristics.

Tables in both volumes of the RA tabulations are organized into six major content areas: (1) Enlistment, (2) Advertising and Promotional Events, (3) Media Habits, (4) Recruit Background and Demographic Description, (5) Parental Household Characteristics, and (6) Influencers. Survey items are thus presented within the appropriate subject area.

Several survey items which are documented in the 1985 code-books were intentionally excluded from the crosstabulation volumes for the 1985 NRS. As in previous tabular descriptions from NRS data (1982, 1983, and 1984), recruit demographic characteristics are used to tabulate survey responses but are not in turn tabulated by other variables. In the same general class of variables excluded from the tabulations are survey-report variables used to track the survey sample (e.g., Reception Station location and date of survey), or data quality (e.g., consistency

checks on responses and the number of items missed by respondents). Substantive survey items excluded from the tabular descriptions of NRS-85 Active Army recruits include the following:

- Experimental items (T695-T746) for a vocational guidance instrument is the largest group of excluded items.
- Written responses that had to be coded is the second largest group of excluded items. These include:
 - Specifications of the other places advertisements were seen (T110K1-K2 and T114K1-K2).
 - Messages respondent thought "Diver" commercial was conveying (T651D4-D5).
 - Name of post-secondary school attended most recently (T655).
 - Specifications of other types of post-secondary schools attended (T659A-B).
 - Reasons for not completing post-secondary program attended, if not completed (T660A-C).
 - Specification of other reasons for enlisting rather than pursuing further education (T205A-B).
 - Reason(s) for enlistment in the recruit's own words (T668A-E and T669A-E).
 - Description of successes and things the respondent likes to do (T744-T746 are part of the vocational guidance instrument).
- Month and year of attendance (first/last) at last post-secondary school attended (T659A-B and T660A-B).
- Amounts of educational benefits and personal contributions (T629A-C, T630A-C, T632A-C, T770A-C, and T771A-C were reported in this format \$ _ _ , _ _ _).
- Number of cars by model year at recruits' household (T665).
- Type of occupational certificate received (T662B).
- Type of Military Occupational Specialty (MOS) (T767).

All of these excluded substantive survey items require significant analytic work before meaningful information can be reported. For example, the written responses for T651D, T668, T669, T744, T745A, T745B, and T746 have not yet been coded (classified) from the verbatim responses which have been transcribed to a computer file. Other items such as number of cars by model year can only provide useful information to market researchers when combined with other data elements. Such combinations of data elements are beyond the scope of this tabular description.

Volume 1 in the RA Tabular Description presents tables of 1985 NRS survey items with the following five crossing variables: (1) respondent gender, (2) highest level of education, (3) AFQT category (GM³ responses only), (4) year of high school graduation (for high school diploma graduates and post-high school graduates only), and (5) ethnic/racial group. Volume 2 for the RA contains tables of the same survey items with five additional crossing variables: (6) term of enlistment (GMA⁴ responses only), (7) eligibility for the Army College Fund and/or cash incentives (GMA responses only), (8) region (recruiting brigade), (9) rural/urban nature of preenlistment residence, and (10) age at DEP contract signing. See The 1985 ARI Survey of Army Recruits: Codebook for Summer 85 Active Army Survey Respondents (Research Note 86-48) for details on the construction of the crossing variables for the active Army component. Table 1 provides an overview of the construction of the crossing variables used in this volume.

³GM refers to male, high school graduates and post-high school graduates.

⁴GMA refers to male, high school graduates and post-high school graduates in AFQT categories 1-3A.

Table 1
Crossing Variables for Volume 1 of the
Tabulations for the Active Army Component

Variable	Source
Gender	Enlistment Record (ORMF)
Highest Education	Enlistment Record (ORMF) Note: POST = Achieved education beyond high school. HSDG = High school diploma graduate. NHSG = Achieved less than a high school diploma.
AFQT (1980 Norms)-- GM responses only	The Enlistment Record (ORMF) reports AFQT scores based on World War II Norms for recruits tested prior to 1 October 1984. These scores have been renormed using the 1980 Youth Norms that went into effect 1 October 1984 so that the AFQT scores used for analyses presented in this report are all on the same metric. Note that because there were only 81 male high school diploma graduates (GM) in AFQT category 4, their responses are not included in the tabulations. This will reduce the likelihood that extremely low cell frequencies will cause inflated chi-square statistics that would result in some analyses appearing to be statistically significant when they actually are not.
Year of HSDG-- HSDG/POST responses only	Survey item--see tabulation of item HSYEAR on pages 278-283. Note: This variable is an approximation of contracting as a high school senior or as a high school graduate.
Ethnic Group	Enlistment Record (ORMF)

Contents of a Tabulation Page

Tabulation pages contain descriptive information about the survey item as well as presenting the tabled data. Descriptive information includes: variable name, variable label, statement of the survey question, response category values and labels, and question location (Form and question number, e.g., A034 = Question 34 on Form A) on the 1985 NRS instruments. When the survey item has been altered from its original presentation in the instrument, the notation "recoded" precedes the statement of the question. Five survey items were recoded in order to reduce the number of original answer categories to make reading the crosstables easier.

In addition to the items mentioned above, each tabulation page contains information to aid in the interpretation of the tables themselves. This information includes: the number of

completed surveys containing the survey item obtained from non-prior service members, table title (survey item by crossing variable), labels for the categories of the crossing variable, the actual number of respondents within each category of the crossing variable, the total number of individuals answering the particular question, value categories for the survey item, the percentage of responses within each category of the crossing variable, and Pearson's chi-square statistic with its associated degrees of freedom and probability. Serial list question sets which instructed respondents to "mark all [response categories] that apply" were reconfigured for presentation in a single, combined table. Chi-square statistics, degrees of freedom, and probabilities are presented for each line in these summary tables. An example of this type of table and further discussion are provided in the next section of this chapter.

The emphasis of NRS is on Army recruits with no prior service experience. For this reason, respondents were selected for tabular presentation only if "no prior military service" was recorded on their official Army personnel records. Note that only 0.7% of the 1985 Summer RA respondents had had prior military service. There are too few of these respondents to support extensive analysis.

The total number of responses may differ from table to table as well as differ in comparison with the reported number of completed surveys. There are two major reasons for such differences. One is item nonresponse (i.e., respondents who failed to answer the question, provided more than one answer, or wrote an uninterpretable, or out-of-range response). A second reason for differences in the reported numbers of respondents relates to whether or not particular survey items were included on all three forms of the 1985 Summer NRS for RA recruits. While some survey items were included on all forms, other items were on only 1 or 2 of the 3 forms. Thus, for certain survey questions, the responses of roughly one-third of all RA respondents will necessarily be missing since the items were not included on their survey forms. Each tabulation page reports the number of non-prior service RA recruits who completed surveys containing that particular survey item. This number is reported in the upper portion of each tabulation page with the label, "Total NPS Surveyed."

Tabulation Conventions

Each of the six major content areas contains numerous tables with relevant survey items. Survey items are included in five two-way tables corresponding to the five crossing variables in Volume 1. The tables for each survey item are typically laid out across two facing pages. The first page contains all the descriptive information about the survey item (i.e., variable

name, question, value labels) plus the first two tables. The second page contains the final three tables. In instances in which the survey item has ten or more values, only one table is presented per page due to space limitations.

Figure 1 provides an example of a table for a recoded survey item requesting a single response. The numeric indicators on Figure 1 are identified and their referents described on subsequent pages.

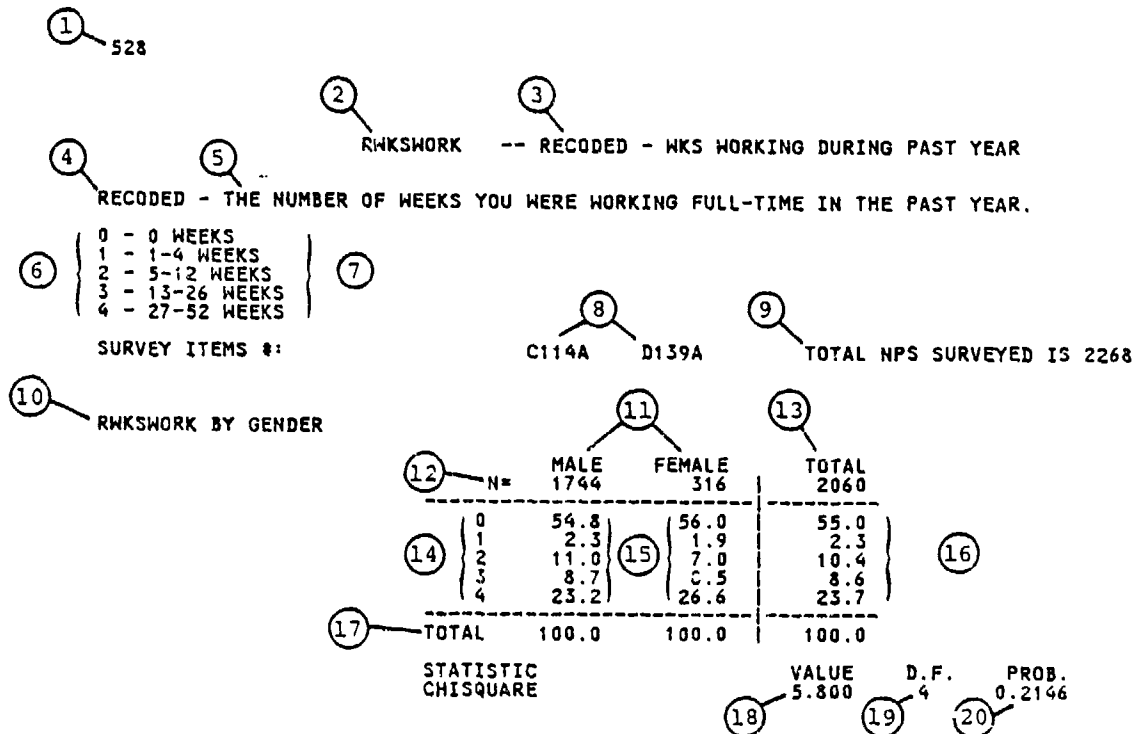

Figure 1. Example of a tabulation page for a recoded survey item.

EXPLANATION OF FIGURE 1

CONTENTS OF A TABULATION PAGE FOR A RECODED SURVEY ITEM

- 1 Page number.
- 2 Variable name for tabled survey item.
- 3 Variable label.
- 4 Notation indicating that the survey item has been altered from its original format. Changes are due to regrouping of response alternatives.
- 5 Statement of survey item. In some instances, item wording has been modified to be more interpretable as a stand-alone item on a tabulation page. See Appendixes for exact wording and context.
- 6 Actual/recoded values of tabled survey item.
- 7 Value labels for tabled survey item.
- 8 Question location on each form of the 1995 NRS. The letter of the survey form appears first followed by the question numbers. When the question was not included on a specific survey form, the space for that survey form (A-D) is left blank. In some instances, all spaces for question location will contain the letter "A" followed by three numbers. This convention is used when the question appears in the background section of all the survey instruments and has no specific question number. The "A" designates the item's inclusion in the background section of the instruments; the number is an indication of the approximate order of presentation.
- 9 Total number of completed surveys that were received from non-prior service RA recruits. This number is an unweighted count based on the survey sample. In this example, it indicates that 2,268 non-prior service RA respondents completed surveys containing the survey item.
- 10 Table title (survey item by crossing variable label).
- 11 Value labels for crossing variable. In this example, the labels describe the categories of gender which can only be male and female. Each of the crossing variables have unique value labels which will remain the same across survey item/table presentation.
- 12 Frequency counts of responses to survey item broken down by category of the crossing variable. These may be referred to as 'marginal N's' since they provide an overall count or number of responses within each category of the crossing variable.
- 13 Total number of valid responses. This is a marginal N of total responses to this survey item across crossing variable categories. In contrast to item 9 (N of NPS completed surveys), this N will necessarily vary across tables due to missing values on particular survey items and on crossing variables; however, this number will always be less than or equal to the number reported in item 9.
- 14 Survey item values. Only item values are presented in the actual tables to preserve clarity; however, these values are described (labeled) at the top of the tabulation page (see item 6).
- 15 Sample percentages broken down within crossing variable categories.
- 16 Sample percentages of responses across crossing variable categories. These percentages are presented for each survey item category.
- 17 Total column percents. These column percentages will equal 100% in all tables, since the percentages of sample responses within each crossing category must account for the total responses within that crossing category.
- 18 Value of the chi-square statistic.
- 19 Degrees of freedom (D.F.) associated with the chi-square statistic.
- 20 Probability based on the chi-square distribution (see the final section in this chapter for a discussion on interpretation of the chi-square statistic).

Figure 2 presents an example of a table combining the response categories for a serial list question set. A special table format was devised and variables in the series were reconfigured for inclusion in the table. Essentially the same information is provided for serial list question sets as is available for the more typical, single response items. Tables for serial list question sets, because they combine a series of variables, contain multiple chi-square statistics. Aside from this difference, the two table formats contain the same types of descriptive information and tabular data.

Serial list question sets pose an overall question such as, "Which of the following mathematics and technical courses, if any, did you take and pass in high school?", and then request the respondent to evaluate (by checking the item to indicate "yes" and leaving the item unchecked to indicate "no") each response category in the series. Each response category is used to construct a dichotomous variable indicating whether or not the respondent checked the item. In the previous example, a respondent might have checked the subjects, Physics, Calculus, and Trigonometry, and have left Computer Science and Business Math unchecked. Variables would have been constructed for each of the five subjects; the value "1" would be used to indicate which subjects were reported to have been taken and passed; the value "0" would be assigned when the subject was not selected.

An attempt was made to combine all serial response categories into a single table for ease of substantive interpretation of the overall question. This required the development of a special table format. The percentage of individuals checking each response category was input to a summary table as presented in the tabulations. Each row in the summary table contains a different variable corresponding to one of the response categories in the serial list question set. Each summary table, then, consists of a series of related variables tabled with a crossing variable. Using the example in Figure 2, the summary table for T198 actually represents ten 2x2 tables. Row A represents the 2x2 table:

T198 by Gender

	N=	Male 3801	Female 703	Total 4504
Checked A		76.6	82.9	77.6
Did Not Check A		23.4	17.1	22.4
	Chi-Square	DF		Probability
	13.6	1		0.0002

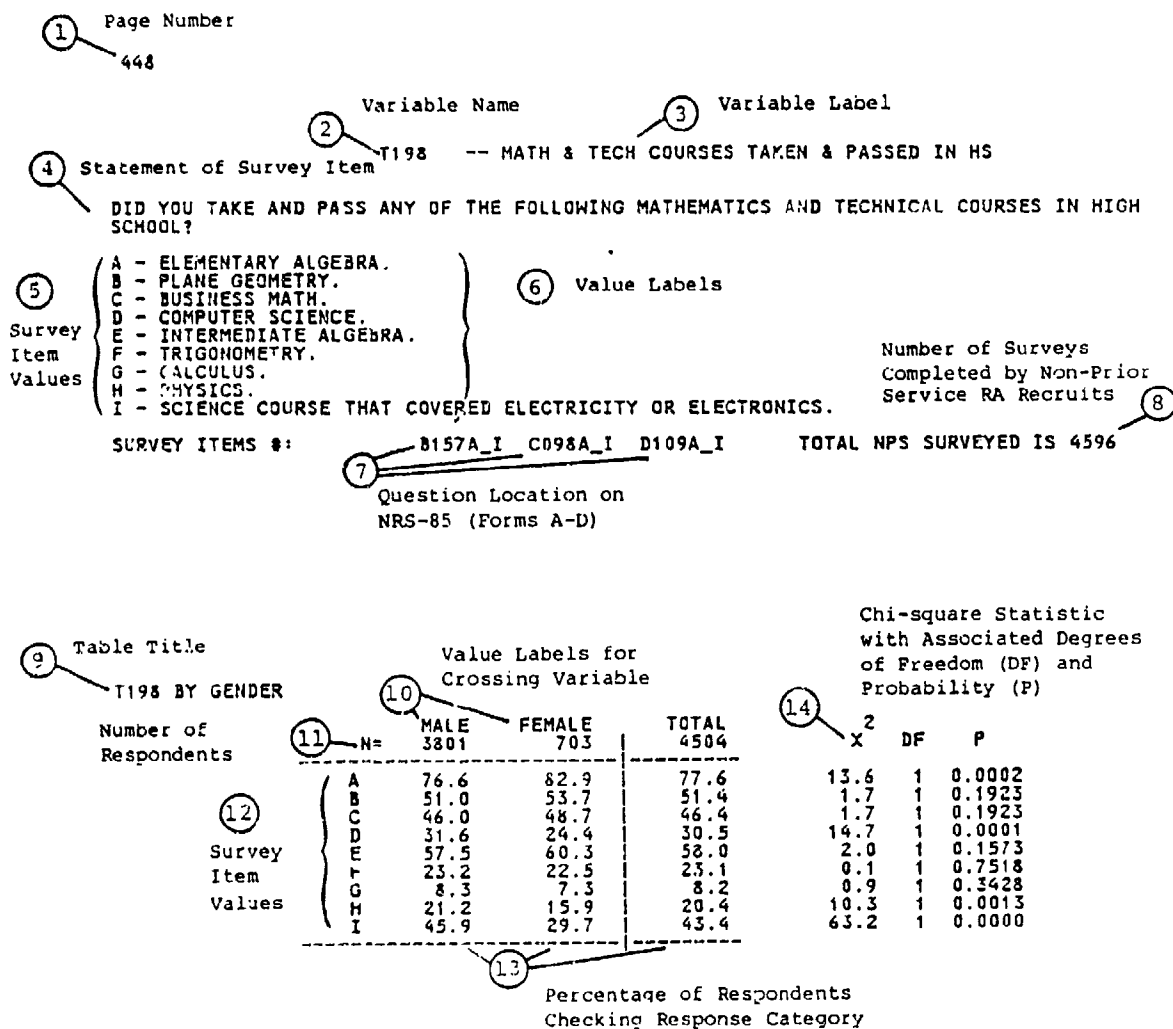

Figure 2. Example of a tabulation page for a serial list question set.

Each row in the summary table for T198 represents a table which includes both the percentage of individuals checking the response category as well as the percentage of respondents who answered the question but did not check the particular response category. For conciseness, only the percentage of individuals checking a particular category was presented in the summary table.

Interpretation of Row A in the summary table shown in Figure 2 is as follows:

- 76.6% of all male respondents to T198 reported having taken and passed elementary algebra in high school; 23.4% of the males did not report taking and passing elementary algebra in high school. Similarly, 82.9% of female respondents reported taking and passing elementary algebra, 17.1% did not report taking and passing this course in high school. The population percentages of all responses to T198 categorized 77.6% of new recruits as having taken and passed elementary algebra in high school and 22.4% as not having had the class.
- The chi-square statistic associated with Row A in the summary table is testing the relationship between gender and taking and passing elementary algebra in high school. The chi-square value at 13.6, with 1 degree of freedom, yields the probability 0.0002. This is considered to be a highly significant statistical difference. (See the next section in this chapter for a discussion of the interpretation of the chi-square statistic.)

As in the example above, the other rows in the summary table for T198 may also be interpreted as if the percentages of individuals not checking the response categories were presented. The chi-square statistics were calculated using this complete information.

Exclusion of Selected Responses from Survey Items

The crosstabulations presented in this volume for the six survey items that pertain to enlistment incentives (i.e., T060, T061, T064, T065, T067, and T068) exclude responses from recruits who did not receive (or are not eligible to receive) the relevant incentives. These six variables may be grouped into three pairs according to incentive: (1) T060 and T061 pertain to Army College Fund (ACF) eligibility; (2) T064 and T065 are related to the two-year enlistment option; and (3) T067 and T068 are related to receipt of a cash enlistment bonus.

Three variables were derived using ORMF data as indicators of ACF eligibility, the two-year enlistment option, and receipt of cash enlistment bonus. Table 2 presents the ORMF-derived variables that were used to determine whether or not to include respondents in the crosstabulations for items T060, T061, T064, T065, T067, and T068. For example, if the ORMF-derived variable, ACFKICK had a value of "1" which indicates the recruit is eligible to receive the ACF, then the recruit's responses to questions T060 and T061 were included in the crosstabulations for those items.

Table 2
ORMF-Derived Variables Used to Assess
Survey Response Consistency

ORMF-Derived Variables	Survey Variables
ACFKICK = 1 = Eligible for ACF	T060 and T061
ENLTERM = 2 = 2 Year Enlistment Option	T064 and T065
CASHBON = 1 = Received Cash Enlistment Bonus	T067 and T068

Interpreting Pearson's Chi-Square Statistic

A Pearson's chi-square statistic is reported for each table in this tabulation volume. The chi-square is a measure of the relationship between the survey item and crossing variable. In addition to reporting this statistic, each table also presents the associated degrees of freedom (D.F.) and the probability (abbreviated as "PROB.") that a significant relationship exists between the survey item and crossing variable.

As a guide to readers of this volume, it is suggested (following accepted social science conventions) that only tables with chi-square probabilities of .01 or less (e.g., .0090, .0050, .0001, .0000, etc.) be interpreted as statistically significant. That is, if a table crossing AFQT category with education level has a chi-square probability of .0098, the reader may conclude that there is a statistically significant relation between

education and AFQT. Any table having a probability greater than .01 (e.g., .0600, .1000, .2500, .8999, etc.) should not be interpreted as significant.

It is important to note that chi-square statistics reported in some of the tabulations in this report may be inflated due to low cell frequencies for some crossing variables. The inflated chi-square statistics may result in some analyses appearing to be statistically significant when they actually are not. For example, the "POST" category for the highest level of education crossing variable includes 264 recruits with education beyond high school. While this is an adequate number for most of the tabulations presented in this volume, the cell frequencies for the POST category become too small when crossed by variables with many value categories such as T657 (i.e., major field of academic study).

The chi-square statistic, then, indicates which variables are statistically related. This statistic does not, however, inform the reader about the form of the relation. In the example above, a relationship was said to exist between AFQT category and education level. Based solely upon the chi-square statistic, we cannot say whether individuals in the higher AFQT categories are relatively more educated than those in the middle or lower categories or vice versa: it only implies that there is a reliable difference between the groups; it does not imply that each group differs from every other group. To determine the form of the relationship between the variables, additional statistical tests are required.

Use of the Tabulation Index

The tabulation index on the following pages provides a table of contents for the tabulations. The index provides three pieces of information for each survey item: variable name for the survey item, variable label, and page number. The index listing for each survey item is presented in the sequence of their presentation in the tabulations. The index lists all survey items within each of the six major content areas. The index should be used as one would use a table of contents to locate crosstables for particular survey items.

APPENDIX A

THE 1985 ARI SURVEY OF ACTIVE ARMY RECRUITS
(FORM A)

Form - A

1985 ARI SURVEY
OF ACTIVE ARMY RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. This information will be used for research and analysis purposes only.

HOW TO FILL OUT THIS SURVEY

- a. Listen to the directions given before you begin.
- b. Read each question carefully.
- c. Mark your answers directly on this form.
- d. Circle the number next to the answer(s) that best fits your opinion. Some questions should only have one answer; others will direct you to circle all that apply. Be sure to read the directions carefully.
- e. If you have any questions, please raise your hand and someone will come around to help you.

HOW TO ANSWER THE QUESTIONS

There are several types of questions that will be asked in the questionnaire. For most questions, several choices will be provided and you will indicate which is the best answer or answers for you. Sometimes you will be directed to give only one answer, as in this example:

What branch of the military are you entering?
(CIRCLE ONLY ONE)

Army..... ①
Air Force..... 2
Navy..... 3
Marines..... 4

There is only one answer possible for this question. Sometimes these questions are presented in a table like this:

	<u>English</u>	<u>Math.</u>	<u>History</u>	<u>Chemistry</u>
Of the following choices, what was your favorite course in high school?	①	2	3	4
What was your second favorite?	1	2	③	4
What was your third favorite?	1	②	3	4
What was your fourth favorite?	1	2	3	④

In this case, one number in each row was circled. Notice that you always CIRCLE THE NUMBER THAT REPRESENTS YOUR ANSWER.

Other times you will be asked to circle as many answers as are appropriate, like this:

Which sports did you participate in while you were in high school? (CIRCLE ALL THAT APPLY)

Football.....	1
Basketball.....	2
Swimming.....	3
Baseball.....	④
Track.....	5
Other (Specify) <u>Soccer</u>	⑥

This person played two sports, but one was not on the list. Therefore, he wrote "Soccer" where it asked for any others, and circled the numbers representing both baseball and any "Other" sports.

In some other cases you will be asked to write a few sentences to answer the question. Those kinds of questions will look like this:

What things that your recruiter told you impressed you the most about the Army?

He told me I would get a chance
to travel and would receive
special skill training.

Do not skip an item that does not seem to apply. If an item does not seem to apply, there will always be a response like "does not apply" for you to circle.

When you have completed the survey and checked to make sure that you have answered all the questions, please bring the survey booklet and the pencil back up to the front. There is no pressure to hurry; this is neither timed nor a test. Take your time and select for each question the one answer that best fits you. Please start now with question 1.

1. What Army component are you entering?

APPENDIX B

THE 1985 ARI SURVEY OF ACTIVE ARMY RECRUITS

(FORM B)

Form - B

1985 ARI SURVEY
OF ACTIVE ARMY RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. This information will be used for research and analysis purposes only.

HOW TO FILL OUT THIS SURVEY

- a. Listen to the directions given before you begin.
- b. Read each question carefully.
- c. Mark your answers directly on this form.
- d. Circle the number next to the answer(s) that best fits your opinion. Some questions should only have one answer; others will direct you to circle all that apply. Be sure to read the directions carefully.
- e. If you have any questions, please raise your hand and someone will come around to help you.

HOW TO ANSWER THE QUESTIONS

There are several types of questions that will be asked in the questionnaire. For most questions, several choices will be provided and you will indicate which is the best answer or answers for you. Sometimes you will be directed to give only one answer, as in this example:

What branch of the military are you entering?
(CIRCLE ONLY ONE)

Army..... ①
Air Force..... 2
Navy..... 3
Marines..... 4

There is only one answer possible for this question. Sometimes these questions are presented in a table like this:

	<u>English</u>	<u>Math.</u>	<u>History</u>	<u>Chemistry</u>
Of the following choices, what was your favorite course in high school?	①	2	3	4
What was your second favorite?	1	2	③	4
What was your third favorite?	1	②	3	4
What was your fourth favorite?	1	2	3	④

In this case, one number in each row was circled. Notice that you always CIRCLE THE NUMBER THAT REPRESENTS YOUR ANSWER.

Other times you will be asked to circle as many answers as are appropriate, like this:

Which sports did you participate in while you were in high school? (CIRCLE ALL THAT APPLY)

Football.....	1
Basketball.....	2
Swimming.....	3
Baseball.....	④
Track.....	5
Other (Specify) <u>Soccer</u>	⑥

This person played two sports, but one was not on the list. Therefore, he wrote "Soccer" where it asked for any others, and circled the numbers representing both baseball and any "Other" sports.

In some other cases you will be asked to write a few sentences to answer the question. Those kinds of questions will look like this:

What things that your recruiter told you impressed you the most about the Army?

He told me I would get a chance
to travel and would receive
special skill training.

Do not skip an item that does not seem to apply. If an item does not seem to apply, there will always be a response like "does not apply" for you to circle.

When you have completed the survey and checked to make sure that you have answered all the questions, please bring the survey booklet and the pencil back up to the front. There is no pressure to hurry; this is neither timed nor a test. Take your time and select for each question the one answer that best fits you. Please start now with question 1.

APPENDIX C

THE 1985 ARI SURVEY OF ACTIVE ARMY RECRUITS

(FORM C)

Form - C

1985 ARI SURVEY
OF ACTIVE ARMY RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. This information will be used for research and analysis purposes only.

HOW TO FILL OUT THIS SURVEY

- a. Listen to the directions given before you begin.
- b. Read each question carefully.
- c. Mark your answers directly on this form.
- d. Circle the number next to the answer(s) that best fits your opinion. Some questions should only have one answer; others will direct you to circle all that apply. Be sure to read the directions carefully.
- e. If you have any questions, please raise your hand and someone will come around to help you.

HOW TO ANSWER THE QUESTIONS

There are several types of questions that will be asked in the questionnaire. For most questions, several choices will be provided and you will indicate which is the best answer or answers for you. Sometimes you will be directed to give only one answer, as in this example:

What branch of the military are you entering?
(CIRCLE ONLY ONE)

Army..... ①
Air Force..... 2
Navy..... 3
Marines..... 4

There is only one answer possible for this question. Sometimes these questions are presented in a table like this:

	<u>English</u>	<u>Math.</u>	<u>History</u>	<u>Chemistry</u>
Of the following choices, what was your favorite course in high school?	①	2	3	4
What was your second favorite?	1	2	③	4
What was your third favorite?	1	②	3	4
What was your fourth favorite?	1	2	3	④

In this case, one number in each row was circled. Notice that you always CIRCLE THE NUMBER THAT REPRESENTS YOUR ANSWER.

Other times you will be asked to circle as many answers as are appropriate, like this:

Which sports did you participate in while you were in high school? (CIRCLE ALL THAT APPLY)

Football.....	1
Basketball.....	2
Swimming.....	3
Baseball.....	④
Track.....	5
Other (Specify) <u>Soccer</u>	⑥

This person played two sports, but one was not on the list. Therefore, he wrote "Soccer" where it asked for any others, and circled the numbers representing both baseball and any "Other" sports.

In some other cases you will be asked to write a few sentences to answer the question. Those kinds of questions will look like this:

What things that your recruiter told you impressed you the most about the Army?

He told me I would get a chance
to travel and would receive
special skill training.

Do not skip an item that does not seem to apply. If an item does not seem to apply, there will always be a response like "does not apply" for you to circle.

When you have completed the survey and checked to make sure that you have answered all the questions, please bring the survey booklet and the pencil back up to the front. There is no pressure to hurry; this is neither timed nor a test. Take your time and select for each question the one answer that best fits you. Please start now with question 1.

1. What Army component are you entering?

APPENDIX D

THE 1985 ARI SURVEY OF THE
ARMY RESERVE/NATIONAL GUARD RECRUITS

(FORM D)

Form - D

1985 ARI SURVEY OF
ARMY RESERVE/NATIONAL GUARD RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. This information will be used for research and analysis purposes only.

HOW TO FILL OUT THIS SURVEY

- a. Listen to the directions given before you begin.
- b. Read each question carefully.
- c. Mark your answers directly on this form.
- d. Circle the number next to the answer(s) that best fits your opinion. Some questions should only have one answer; others will direct you to circle all that apply. Be sure to read the directions carefully.
- e. If you have any questions, please raise your hand and someone will come around to help you.

HOW TO ANSWER THE QUESTIONS

There are several types of questions that will be asked in the questionnaire. For most questions, several choices will be provided and you will indicate which is the best answer or answers for you. Sometimes you will be directed to give only one answer, as in this example:

What branch of the military are you entering?
(CIRCLE ONLY ONE)

Army..... ①
Air Force..... 2
Navy..... 3
Marines..... 4

There is only one answer possible for this question. Sometimes these questions are presented in a table like this:

	<u>English</u>	<u>Math.</u>	<u>History</u>	<u>Chemistry</u>
Of the following choices, what was your favorite course in high school?	①	2	3	4
What was your second favorite?	1	2	③	4
What was your third favorite?	1	②	3	4
What was your fourth favorite?	1	2	3	④

In this case, one number in each row was circled. Notice that you always CIRCLE THE NUMBER THAT REPRESENTS YOUR ANSWER.

Other times you will be asked to circle as many answers as are appropriate, like this:

Which sports did you participate in while you were in high school? (CIRCLE ALL THAT APPLY)

Football.....	1
Basketball.....	2
Swimming.....	3
Baseball.....	④
Track.....	5
Other (Specify) <u>Soccer</u>	⑥

This person played two sports, but one was not on the list. Therefore, he wrote "Soccer" where it asked for any others, and circled the numbers representing both baseball and any "Other" sports.

In some other cases you will be asked to write a few sentences to answer the question. Those kinds of questions will look like this:

What things that your recruiter told you impressed you the most about the Army?

He told me I would get a chance
to travel and would receive
special skill training.

Do not skip an item that does not seem to apply. If an item does not seem to apply, there will always be a response like "does not apply" for you to circle.

When you have completed the survey and checked to make sure that you have answered all the questions, please bring the survey booklet and the pencil back up to the front. There is no pressure to hurry; this is neither timed nor a test. Take your time and select for each question the one answer that best fits you. Please start now with question 1.
